Kodikologie und Paläographie im Digitalen Zeitalter 4 Hannah Busch, Franz Fischer, Patrick Sahle, 2017-07-04 Der hier vorliegende vierte Band der Reihe zu Kodikologie und Paläographie im digitalen Zeitalter versammelt Beiträge aus der Forschung im interdisziplinären Schnittfeld traditioneller Geisteswissenschaften und Informatik. Er ist zugleich der Tagungsband der in den Jahren 2014 bis 2016 durchgeführten Veranstaltungsreihe Maschinen und Manuskripte. Die 13 Beiträge aus den Bereichen der digitalen Kodikologie und Paläographie geben Einblicke in aktuelle computergestützte Forschung mit historischen Schriftzeugnissen und schließen Untersuchungen zu Bildern und zur musikalischen Notation ein. Der thematische Rahmen spannt sich dabei von der Erforschung digitalisierter Sammlungen mittels automatischer Mustererkennung über die Erfassung und Analyse von Schrift und Zeichensystemen bis zur Informationsvisualisierung von Forschungsdaten. The present fourth volume of the series on codicology and palaeography in the digital age features articles on research at the interdisciplinary intersection of the fields of traditional humanities and computer science. At the same time it represents the proceedings of the conference series Machines and Manuscripts held from 2014 to 2016. The 13 contributions from the field give insights on current computer-aided research with historical written documents including images and musical notation. The thematic framework ranges from exploration of digitized collections to recognition and analysis of script and sign systems to information visualisation of research data.

Pattern Recognition and Image Analysis Jorge S. Marques, Nicolás Pérez de la Blanca, Pedro Pina, 2005-05-13 IbPRIA 2005 Iberian Conference on Pattern Recognition and Image Analysis was the second of a series of conferences jointly organized every two years by the Portuguese and Spanish Associations for Pattern Recognition APRP AERFAI with the support of the International Association for Pattern Recognition IAPR. This year IbPRIA was hosted by the Institute for Systems and Robotics and the Geosystems Center of the Instituto Superior Técnico and it was held in Estoril, Portugal. It provided the opportunity to bring together researchers from all over the world to discuss some of the most recent advances in pattern recognition and all areas of video image and signal processing. There was a very positive response to the Call for Papers for IbPRIA 2005. We received 292 full papers from 38 countries and 170 were accepted for presentation at the conference. The high quality of the scientific program of IbPRIA 2005 was due first to the authors who submitted excellent contributions and second to the dedicated collaboration of the international Program Committee and the other researchers who reviewed the papers. Each paper was reviewed by two reviewers in a blind process. We would like to thank all the authors for submitting their contributions and for sharing their search activities. We are particularly indebted to the Program Committee members and to all the reviewers for their precious evaluations which permitted us to set up this publication.

Multimodal Interactive Handwritten Text Transcription Veronica Romero, 2012 This book presents an interactive multimodal approach for efficient transcription of handwritten text images. This approach rather than full automation assists the expert in the recognition and transcription process. Until now

handwritten text recognition HTR systems are far from being perfect and heavy human intervention is often required to check and correct the results of such systems The interactive scenario studied in this book combines the efficiency of automatic handwriting recognition systems with the accuracy of the experts leading to a cost effective perfect transcription of the handwritten text images The interactive system here allows the user to repeatedly interact with the system Hence the quality and ergonomics of the interactive process is crucial for the success of the system Moreover more ergonomic multimodal interfaces are used to obtain an easier and more comfortable human machine interaction
